VAIBHAVI JANTRALWALA

Java Full Stack Developer · Java Developer

vaibhavijantralwala@gmail.com | +91 - 6351470915 | github.com/VaibhaviJantralwala | linkedin.com/in/vaibhavijantralwala

PROFESSIONAL SUMMARY

A Computer Engineering graduate with a structured foundation in Java Full Stack development, encompassing backend technologies, relational databases, and responsive front-end design. Committed to writing clean, functional code and developing scalable applications. Seeking an entry-level opportunity to contribute meaningfully while continuing to grow as a full-stack developer.

CORE SKILLS & TOOLS

Core Java	**Advanced Java**	**Eclipse / IntelliJ**	**Hibernate / JPA**
MySQL	**HTML5 / CSS3**	**JavaScript**	**Git & GitHub**
Problem Solving	**Collaborative**	**Adaptable**	**Dependable**

★ **AI Tools Proficiency:** ChatGPT, GitHub Copilot, Google Gemini — leveraged for code debugging, boilerplate generation, and concept clarification during development.

CERTIFICATIONS

Oracle Java Explorer — Oracle (In Progress — 2026)

- Covers core Java programming concepts including object-oriented principles, data types, control flow, and exception handling.
- Builds foundational understanding of the Java ecosystem relevant to enterprise-level full stack development.

PROJECTS

Order Management System — *AdvanceJava · JDBC · Servlets · MySQL*

- Built a full-featured Order Management System using Advanced Java (Servlets, JSP) with MySQL as the backend database.
- Implemented core modules including order creation, status tracking, product inventory management, and customer records.
- Used JDBC for database connectivity with prepared statements ensuring secure and efficient query execution.
- Designed and normalized the relational database schema to support multiple order states and product categories.
- Applied MVC pattern for clean separation of business logic, data access layer, and presentation layer.

Expense Tracker — **UI Development** — *HTML · CSS · JavaScript · (Group Project)*

- Contributed to a group-developed Expense Tracker application, independently responsible for the complete front-end UI design and implementation.
- Designed intuitive, responsive interfaces for expense entry, category filtering, and monthly summary views using HTML5 and CSS3.
- Used JavaScript for dynamic DOM manipulation, form validation, and real-time expense calculation on the client side.
- Collaborated with team members to align UI components with backend data structures and ensure consistent user experience.
- Gained practical experience in team-based development, task delegation, and integrating front-end work with backend logic.

EDUCATION

B.E — Computer Engineering GTU , Sigma Institute of Engineering , Vadodara	*2022 – 2026*
Class XII | Gurukul Vidhyalaya , GSEB	*2022*
Class X | Gurukul Vidhyalaya , GSEB	*2020*

ACHIEVEMENTS & EXTRACURRICULARS

- Currently undergoing intensive Java Full Stack Development training at TOPS Technologies, Vadodara — building industry-relevant skills in Java, Spring Boot, and full-stack web development.
- Successfully developed an Order Management System as an individual project, demonstrating end-to-end application design and database integration using Advanced Java.
- Contributed as UI developer in a group project (Expense Tracker), collaborating effectively in a team environment to deliver a polished front-end interface.
- Strong problem-solving skills with a keen interest in backend architecture, RESTful API design, and scalable software engineering practices.
